

Whimble Primary School - Curriculum Newsletter

Class: Elm Year: 1 Term: Summer 2024

Topic – Farms – Where does our food come from? / Rainforest

Welcome to the Summer Term!

Please look through this newsletter for information about the areas of learning the children in Year 1 will cover this term. The Year 1 children follow learning objectives set out by the National Curriculum and will continue to take part in English, Maths Number sense and Phonics lessons each morning before taking part in other areas of the curriculum in the afternoon such as Music, Computing, PE, RE (Foundation Subjects). We still believe that structured play (Continuous Provision) is an important part of your child's learning in Year 1 and the children will have planned opportunities to participate in this throughout the week.

English

Phonics:

- During 'Little Wandle' phonics lessons we will continue to consolidate Phase 3 and 4 sounds and tricky words. The children will also re-cap learning of phase 5 to strengthen their understanding of the alternate blends and in preparation for their Phonics Screening test in June.

Reading:

- Children will continue to access the school reading scheme (linked to our 'Little Wandle' phonics program) and will read their reading book x3 times in school before bringing this home to practise.
- Children will develop their comprehension skills - linking what they are reading to their own experiences, to make predictions about what will happen based on what they have already read/heard and to join in with predictable phases when they are listening to stories in class.
- Children will visit the school library once a week to change their library book.
- Children will read with their buddies weekly

Writing:

- We have started to teach pre cursive handwriting and will continue with this during the next term.
- Our literacy work will develop around our class focus texts 'The three little pigs' and 'What do you do with a tail like this?', strengthening our understanding of writing grammatically correct sentences whilst building stamina for writing.

At Home: Reading is key to learning in every aspect, your child should be reading on a daily basis. Try to read their individual reading book daily. In addition, they will have a library book which we encourage you to share and discuss at home. Please ensure book bags come to school every day and that reading books are returned on a Monday.

- Practise reading 'tricky' words on sight (tricky word lists in blue book).
- Practise spelling lists (purple spellings book) at home using the look, cover, write and check method.

Maths

We will continue to use Hamilton Plans for our scheme of learning. This term we will focus on:

- Number and Place Value - Securing our understanding of numbers to 20 and beyond.
- Addition and Subtraction - we will strengthen our learning of bonds to 10, 20, 100.
- Shape, Space and Measure - we will consolidate our learning of 2d and 3d shape and patterns, continue to learn to tell the time accurately to the half hour using digital and analogue clocks, and develop our data handling skills using block graphs and pictograms
- Multiplication and Division - we will continue to count in 2's, 5s and 10's and look at sharing numbers.
- Fractions - we will think about whole, half and quarters.

We will continue our daily 'Number Sense' sessions to develop our knowledge and recall of number facts and how to use this knowledge when problem solving.

At Home: Enable children to help with everyday maths at home, such as measuring and weighing items, paying for things in the shop, looking at the time and discussing what happens at certain times of the day and on particular days of the week. Use Doodle Maths. Year 1 can access a range of resources to support fact knowledge on Google Classroom.

Science - This term our topics are 'Materials- exploring changes' and 'Habitats and homes'. We will use our observation skills and discuss what happens when ice melts, consider what happens to puddles in the playground over time and explore waterproofing when making wax resist pictures. We will design and plan an allotment, plant some seeds, consider how micro habitats meet the needs of the animals that live there and design and make a bug hotel exploring what happens to it over time.

Art and Design

- 3D sculptures
- Learning about textiles and looking at the work of artist Turner
- Food technology- preparing fruit and vegetables (making a fruity face)

Music - Using Charanga Music to support our Music curriculum, we will continue to develop musical skills previously explored whilst introducing improvisation, delivered through songs exploring the social theme of helping us through daily routines. We will also explore sounds and stories using some familiar songs such as 'The Bear Went Over the Mountain' and 'Ten Green Bottles'.

Religious Education - The children will experience a range of religious and non-religious stories. We will talk about these stories, identify some of their own feelings in the stories and explore what they teach believers.

Computing - Digital Writing: To recognise the keys on a keyboard, add and remove text and identify that the look of text can be changed. To explain the tools and choices made to change the text. To compare typing on a computer with writing on paper. **Introduction to Animation:** Using Scratch Jr, children will explore a range of commands and create a simple program.

At home: Use Purple Mash to practise painting and typing skills.

Geography/History - We will just have a Geography focus this term looking at locational knowledge. We will be learning about the continents and oceans and we will be focusing on a Non-European country- Australia.

Languages - In the morning when we complete the register children are encouraged to answer using a range of greetings from other countries. We will learn to sing some simple traditional French songs.

Physical Education - We will continue to use the Real PE scheme to focus on Health & Fitness and Applying Physical Skills, and the Get Set 4 PE scheme to develop dance and invasion game skills. Children will participate in twice weekly PE lessons. Please ensure your child has appropriate PE kit with them on Mondays and Thursdays.

PSHE - Our topic during the first half term is relationships. We will cover: how to make friends, solving friendship problems, helping people feel accepted, treating others with respect, knowing how to help ourselves and others when we are upset or hurt, and knowing what a good relationship looks like. During the second half of term our topic will be about changing. We will cover: understanding that we are all unique, expressing how we feel when changes happen, understanding the changes that happen to us, understanding the changes they see in other people, knowing how to ask for help when worried about change and looking forward to changing.

Our Skills Builder focus, linked to our 6Rs is Reasoning (problem solving) and Resourcefulness (creativity) plus we will continue our focus on the skills of speaking and listening which underpin all aspects of the curriculum.

At home: Continue to encourage your child to become more independent - give them tasks to do to help you at home as well as encouraging them to undertake personal care such as dressing, washing and teeth brushing by themselves.

Thank you for your continued support. We look forward to sharing a busy and exciting final term with our Y1 children.
Miss Corwood & Mrs Handley
